Prince Edward Island, Canada to Mikinduri, Kenya, Africa

This is an invitation to become part of a very exciting project.

Work has just begun to drill the first three wells in Mikinduri. They will bring clean, fresh water to the community for the very first time. The plan is to dig 11 wells around the community.

Clean water is the essential first step. Women of the area are currently travelling long distances to get water from the river, which they carry home on their backs. But this water is polluted and has caused as many problems as it has solved. Access to clean, fresh drinking water will give the people of Mikinduri a whole new lease on life. It will give them health and it will give them hope.

Here's how you can help:

For $85, you can provide water to a family.

For $2550, you can buy a well that will provide clean water to thirty families.

Perhaps this is something you would like to do as a family. Or you could do it at your workplace, in lieu of a Christmas gift exchange. In either case, you will be giving a gift that will have significant consequences.

Please send your donation to:
